Basic Monthly IT Package

Nothing's worse than your computer crashing or requiring an update at an inopportune time. We offer monthly IT maintenance to keep you ahead of the curve with preventative support–at a predictable monthly cost.

What's Included:

Email Security

We'll set up your email to ensure you have email security with long-term archiving abilities. Say goodbye to spam, junk mail, and malicious attachments!

System Updates + Support

We will monitor and automatically update your Microsoft Windows, Office 365, and third party programs. Plus, we're available for support via a secure remote connection!

Social Media Security

Businesses rely on social media to grow, and attackers leverage the platforms' public nature for attacks. We will protect your business profiles from unauthorized access and modification.

Advanced Internet Security

When you connect to the internet, there's a flow of data/traffic reaching your computer. Not all this traffic is "good traffic." We will block dangerous traffic from impacting your computer.

Managed + Monitored Anti-Virus

Installing business-grade anti-virus isn't enough. We'll monitor and manage it, so you always have the most advanced protection.

Data Backups

We will ensure you have daily backups to the cloud to protect your data in case of system failures or other disasters.

Only $125/mo per computer (*12 month contract required.*)

Technology That Works. Security That Protects.™
