## Enhanced Monthly IT Package

The Enhanced Package covers the following inclusions along with everything in the Basic Package. It's for customers who require a higher degree of security for their business and/or have compliance requirements.

### What's Included:

#### 24x7x365 Monitored Advanced Endpoint Security

This software is an enhanced collection of solutions designed to secure an end user's device and protect the broader environment where the user operates.

A security analyst monitors at all times to mitigate and resolve issues. (**Bonus:** \$1M Cyber Threat Protection Warranty)

#### Secure Password Management

Safely store your business and personal passwords, synchronize them across your computers and mobile devices, and securely share passwords among your team.

#### Security Policies and Procedures

Clear and concise security policies are the foundation for an effective security program. We provide the documentation to ensure you know how your business is protected.

#### Simulated Phishing Testing

Email attacks continue to be a significant security risk. We conduct testing to determine the risk to your business then provide the steps needed to help minimize that risk.

#### 24x7x365 Network Security Monitoring, Detection, and Response

We will monitor your network for security issues and respond as needed. Additionally, logs from important devices are collected and analyzed, with full reporting available.

#### Vulnerability Scanning and Management

We will regularly evaluate your computers and network for vulnerabilities and take appropriate corrective action when needed.

#### Dark Web Monitoring

We monitor the Dark Web for indications that your business and personal email credentials have been stolen and provide the requisite steps to resolve any issues.

#### Security Awareness Training

We provide ongoing security awareness training to all employees to improve your business's overall security posture.

**Only \$200/mo per computer** (12 month contract required.)

**Technology That Works. Security That Protects.™**
